REMARKS

This is UNEVALUATED Information

1. It was observed during the period from 14 to 20 January 1951 that a wooden observation post was on the roof of one of the buildings of the Neue or Herzog Ernst Kaserne in Altenburg (N 51/K 27). The observation post was always occupied by a sentry. The occupation of the installation was estimated at least 600 men. Soldiers seen wore red-bordered black epaulets with artillery insignia. Young soldiers were being given infantry training with carbines and machine guns. There were two instruction rooms on the ground floor of one of the barracks buildings, one was equipped for the training of radio operators, while charts of tanks, gun parts and other technical equipment were in the other room. *

* Comment. The report is

believed to refer to the Koenig Georg Kaserne on the west side of Leipziger Strasse. The old barracks installation located opposite the Koenig Georg Kaserne, on the east side of Leipziger Strasse, is the Herzog Ernst Kaserne.
